## GENERAL INFORMATION

## The Easywave radio system

ELDAT first developed the Easywave radio system in 2001, together with partners from the electrical industry. Since then, Easywave has been continuously adapted to meet market requirements.

In developing Easywave, the objective was and remains to this day to create a cost-effective system bearing the "Made in Germany" label, which is easy to use, saves time and optimizes costs.

### Easywave radio: Key technical data

Easywave is a frequency-modulated system which operates at a frequency of 868.3 MHz. While most transmitters have a transmission power below 1 mW.

The transmission duration is regulated and is subject to a maximum duty cycle of 1 %, in other words, a maximum of 36 seconds can be transmitted per hour.

Given the regulations in place across Europe, this radio band is ideal for a wide variety of applications.

There is also no risk of electro smog as less than 1 mW of transmission power is required for only a few milliseconds. Even wires that are constantly live generate higher loads than an active Easywave transmitter. In this way, Easywave radio can even be used in a medical environment.

### Easywave neo

Modern building management systems require a high level of switching reliability and constant monitoring of the current status of all connected devices.

These requirements are optimally met with the new, **bidirectional** Easywave neo radio system.

The new Easywave neo products are immediately recognizable by the new logo:

### Easywave neo – bidirectional radio

With the bidirectional Easywave neo radio, all received or sent radio commands are acknowledged by the receiver. If no acknowledgement is received, the radio command is resent several times.

This ensures a high level of transmission reliability and makes the radio system less susceptible to interference.

If an Easywave neo device indicates a successful transmission, you can be sure that, for example, the light in the basement is really off.

If a transmission fails despite several attempts, the system informs you of the problem and appropriate measures can be taken. Often the distance between the transmitter and receiver is simply too great and a new location for the devices solves the problem.

### Easywave neo – compatibility

Easywave neo products are 100% backwards compatible with previous Easywave devices.

This means that existing systems can continue to be used and only be expanded with bidirectional devices if required.

During programming, Easywave neo receivers automatically detect whether the transmitter to be programmed offers bidirectional functions and provide the corresponding range of functions.

The center of the bidirectional radio system is the Easywave Control Center or the APPMODULE. These are able to receive and send Easywave, Easywave neo and secwave radio telegrams.

## Applications

Our customers use Easywave for a wide range of applications. Installing radio systems is a convenient and clean solution for technical building services, and has evidently been met with growing enthusiasm on the market.

The main demand is for systems that can be used for a variety of applications and that are capable of far more than just controlling lighting and roller shutters.

Our reliable Easywave radio system answers this call for flexibility and product diversity. Simple lighting or blind controls can be retrofitted with hand transmitters or radio wall switches that are easy to mount or attach on the wall.

Existing switch systems can be enhanced with radio wall switches as these can be integrated into the appropriate cover frame.

Other electronic devices, such as fans or air conditioning units, can be switched on or off using hand transmitters combined with the appropriate receivers or door/window contacts and other sensors.

Radio technology is also ideal when it comes to technology in meetings and seminars, whether it is used to dim the lights or to move projector screens.

Moreover, today's demographic change requires that technology be upgraded and modernized in order to improve our personal comfort and thereby enable people to lead autonomous lives. Here, radio technology plays an ever greater role which we live up to with our product range.

In short, Easywave radio technology is not only contemporary but it is also extremely flexible and can be relied on from room to room.

Below are examples of two major areas of application:

### Applications all around the building

for lighting, roller shutters, awnings, windows, doors, gates, heating, air-conditioning, ventilation, access, etc.

### Applications in the area of assisted living (AAL)

for wheelchairs, environment control, nursing beds, call systems, assistive technology, signaling and monitoring devices, etc.

## Range

The range of a transmission path depends on many factors. For this reason, caution must be taken when making claims about range. A relatively reliable indicator of range is the range in free-field conditions. Easywave products aim to achieve a range of at least 150 m in optimal free-field conditions.

Factors which may influence the range include the mounting site, the mounting surface, objects in the transmission path, the power of the transmitter and the sensitivity of the receiver.

As an example, the following estimates indicate to what extent objects in the transmission path can cause attenuation:

Material	Attenuation
Air/free field	0 %
Wood/plaster	5-20 %
Brick/concrete	10-40 %
Reinforced concrete	50-90 %
Metal walls/metal grating	90-100 %

Should the range be insufficient in certain cases, it can be increased with the help of repeaters.

## General guidance on how Easywave technology works

The system can generally be programmed very easily using a single button on the **receiver**.

This programming button triggers 3 functions:

### Programming mode

A transmitter or a transmitter button is programmed into a receiver's memory. A receiver reacts only to preprogrammed transmitters.

### Delete mode

Individual programmed transmitters or transmitter buttons are erased from the receiver's memory. The receiver subsequently no longer reacts to this transmitter.

### Reset

A reset will erase all transmitters from a receiver's memory and will restore the receiver to the factory default settings. The receiver subsequently no longer reacts to any transmitters.

Each **transmitter** has a unique serial number. The buttons of a transmitter have the key codes A, B, C or D.

In this way, each transmitter has a **serial number** and each serial number has up to four **key codes**. A transmitter with more than four buttons has several serial number.

Depending on its intended use, each **receiver** has one or several operating modes:

### 1-button operation

A defined sequence of different functions is triggered by using one transmitter button. For example, ON/OFF, PULSE, DEADMAN.

A transmitter with four buttons (A, B, C, D) could control four different devices.

### 2-button operation

For this operating mode, a pair of buttons is always necessary. The A and B buttons as well as the C and D buttons are pairs of buttons.

For example, the A button can be used to switch ON and the B button to switch OFF, or the A button can be used to move UP and the B button to move DOWN. The C and D pair of buttons operates in the same way.

### 3-button operation

3-button operation is generally used for motor applications. Here, the A button has the UP function, the B button has the DOWN function and the C and D buttons (if available) have the STOP function.

### PULSE SEQUENCE

The pulse sequence is another operating mode for controlling motor receivers with just one button.

When a button is pressed, drive or stop commands are triggered in a defined sequence:

UP → STOP → DOWN → STOP → UP → ...

With a transmitter with four buttons (A, B, C, D), for example, four different motor receivers can be controlled.

### PULSE

Regardless of the duration for which the transmitter button is pressed, the receiver or the control is activated for 1 second (= one pulse).

## DEADMAN

The receiver or the control remains activated as long as the transmitter button is pressed. However, it is important to note that the maximum transmission duration is 36 seconds. Depending on the product, however, it may also be shorter.

## TIMER

Regardless of the duration for which the transmitter button is pressed, the receiver or the control is activated for a period of time determined by the product

Moreover, there are also receivers with specific operating modes for specific applications. These operating modes and the buttons assigned to them are described in the operating manual of the relevant receiver.

The functions assigned to the key codes for each corresponding operating mode can be found in the following table:

Operating mode		Key code / Function				Explanation
		A	B	C	D	
PULSE		PULSE	PULSE	PULSE	PULSE	switching duration 1 second
1-button operation	universal	ON/OFF	ON/OFF	ON/OFF	ON/OFF	sequenced switching
	motor	UP/ STOP/ DOWN	UP/ STOP/ DOWN	UP/ STOP/ DOWN	UP/ STOP/ DOWN	pulse sequence
2-button operation	universal	ON	OFF	ON	OFF	
	motor	UP	DOWN	UP	DOWN	stop with the opposite direction button
3-button operation	universal	no products				
	motor	UP	DOWN	STOP	STOP	
DEADMAN		ON	ON	ON	ON	as long as button is pressed
TIMER		ON	ON	ON	ON	switching duration variable

# RT42 | RT43 Hand transmitter

## PULSE

The RT42 and RT43 are radio transmitters designed for universal use. They can be used together with any Easy-wave receiver and in any of the operating modes available.

The RT43 is the standard version with a plastic bracket, whereas the RT42, the premium version, is equipped with a chrome-plated metal bracket.

The transmitter can be used to control roller shutters for example or, more generally, to switch electrical devices on or off.

An easily visible LED lights up when the battery needs to be changed.

# RT34 Hand transmitter

## PULSE | ON/OFF | UP/STOP/DOWN

The RT34 hand transmitter is a highly versatile transmitter with up to ten channels.

Depending on the model, it can be used for a variety of different applications:

**4-channel version:** Controlling two roller shutters in the UP/STOP/DOWN operating mode and switching two electrical devices on or off with a 2-button operation.

**5-channel version:** Switching up to five electrical devices on or off with a 2-button operation.

**10-channel version:** Switching up to ten electrical devices on or off with a 1-button operation.

# RT22 Hand transmitter

ON/OFF | UP/STOP/DOWN

The RT22 hand transmitter can control 24 Easywave receivers.

The RT22 has four levels (I to IV), each with six individually coded radio channels:

- 5 channels have the ON/OFF function
- 1 channel has the UP/STOP/DOWN function.

The multi-channel transmitter is best used when multiple Easywave receivers need to be controlled from a single hand transmitter.

Its solid housing and large buttons, which are easy to operate, make the RT22 suitable for industrial applications.

RT22E5022-01-23K

## Technical specifications

# RT28 Push button transmitter

## PULSE

The RT28 push button transmitter is functionally designed with a large control button.

It is most commonly used to switch electrical devices on and off with a 1-button operation or as a bell button in connection with the RCP04 radio bell.

An LED indicates if the battery needs to be changed. If the battery is running low, a separate radio signal is transmitted which can be analyzed by a corresponding Easywave receiver.

RTS13E5001-01-02K	Radio wall switch, Easywave, 1x UP/STOP/DOWN, white

# WALL TRANSMITTERS Format 55

The term Format 55 indicates that the products are compatible with cover frames which have a cut-out dimension of 55 x 55 mm.

The wall transmitters can be purchased either **modularly** or as a **complete** wall transmitter, including rocker(s) and cover frame.

Complete wall transmitters include a rocker and the ELDAT cover frame (RTS22-ACC-05).

The modular wall transmitters can be assembled as follows:

Radio wall switch	Associated rockers			Cover frame	
	+			+	
RTS22E5002A11-02K for single rocker		RTS22-ACC-02-xxP 1x ON/OFF white, anthracite, alu	RTS22-ACC-03-xxP 1x UP/DOWN white, anthracite, alu		RTS22-ACC-05
	+			+	
RTS23E5004A11-02K for double rockers		RTS23-ACC-01-xxP2 2x ON/OFF white, anthracite, alu	RTS23-ACC-02-xxP2 2x UP/DOWN white, anthracite, alu		RTS22-ACC-05
			RTS23-ACC-03-xxP2 1x UP/STOP/DOWN white, anthracite, alu		

In addition to the ELDAT cover frame, cover frames from other manufacturers from the following compatibility list can also be used:

## Manufacturer \*) Products (brand articles) \*)

BERKER	S.1, B.3, 7
Busch Jaeger	Balance SI

# RTS22 Wall switch modular

## Format 55 Single rocker

The RTS22 wall switch from the Format 55 range is a battery-powered Easywave transmitter. The function of the wall switch is defined by combining it with different rockers.

The radio switch can be integrated into cover frames with a cut-out dimension of 55 x 55 mm produced by various manufacturers (see compatibility list).

The transmitter module is combined with the desired rocker, simply clicked into the cover frame and is immediately operational. It can then be mounted on the wall using either adhesive pads or screws.

The RTS22 is generally used as a light switch to turn lights ON or OFF with a 2-button operation as well as to control roller shutters.

Please order the rocker separately!

RTS22E5002A11-02K

# RTS33 Wall switch

## Format B5 Double rockers

The RTS33 wall switch from the Format B5 range is a battery-powered wall transmitter that must be surface-mounted in dry rooms. The function of the wall switch is defined by combining it with different rockers.

The transmitter is compatible with the Busch-Jaeger switch range (see compatibility list). The transmitter module is combined with the desired rocker, simply clicked into the cover frame and is immediately operational. It can then be mounted on the wall using either adhesive pads or screws.

The RTS33 is generally used as a light switch to turn lights ON or OFF with a 2-button operation as well as to control roller shutters.

Please order the rockers separately!

RTS33E5004A11-02K

# RTS07 Radio time switch

## UP/STOP/DOWN

The RTS07 radio time switch is battery-powered and designed to be mounted indoors. It controls Easywave receivers depending on time and brightness settings.

The time switch has four individually coded radio channels enabling it to control four devices, such as electrical roller shutters, awnings or lighting.

The brightness control function for roller shutters only works in connection with the SL01 light sensor.

It is possible to transmit the different telegrams together and thus to control all four devices at the same time (group function).

RTS07E5004-01-02K

### Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	4
Range	typically 150 m in good free-field conditions
Power supply	1x 3V-battery, CR2032
Operating indicator	Display
Operation	see operating manual
Operating temperature	0 °C to +50 °C
Dimensions (W/L/H)	80/80/16 mm
Weight	50 g (including battery)

### Models

Product number	Description
RTS07E5004-01-02K	Radio time switch, Easywave, 4x UP/STOP/DOWN, white

# RTS03 Built-in transmitter

## multifunction

Two standard buttons, two switches or one blind switch can be connected to the RTS03 built-in transmitter.

This turns conventional switch programs into radio switches and can therefore operate Easywave receivers.

Due to the small size, installation directly in a flush-mounted box is possible without any problems.

The transmitter is powered either via the built-in battery or wired with 3V DC.

[One version for everything:](#)

Compatible with all Easywave operating modes!

RTS03E5002C01-K

### Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	2
Transmission time	max. 36 seconds
Range	typically 150 m in good free-field conditions
Power supply	1x 3V-battery, CR2032 or 3V DC wired
Operation	by connected button/switch
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	33/36/14.5 mm
Weight	10 g

RTS03E5002C01-K	Built-in transmitter, Easywave, 2x PULSE   2x ON/OFF   1x UP/STOP/DOWN, white

# RTS39 Flush-mounted transmitter

## 230 V

Up to two 230 V buttons or two 230 V switches can be connected to the RTS39 stationary transmitter.

This allows any commercially available 230V button or 230V switch, to switch Easywave radio receivers via radio without any complex rewiring.

The flat design facilitates installation in flush-mounted sockets, behind switches or behind push buttons.

RTS39E5002D01-K

### Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	2
Transmission time	max. 36 seconds
Range	typically 150 m in good free-field conditions
Power supply	230 V AC, 50 Hz
Power consumption	max. 0.43 W 0.1 W Standby
Operation	by connected button/switch
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	43/42/17.5 mm
Weight	32 g

RTS39E5002D01-K	Flush-mounted transmitter, Easywave, 2x ON/OFF   2x PULSE, 230V

# RTS17 Built-in transmitter

## PULSE

The RTS17 built-in transmitter can be connected to a live power source of between 5 V and 24 V AC or 6 V and 32 V DC. As soon as the transmitter is supplied with power, it transmits a telegram with the transmission code A for a maximum of 10 seconds.

Usually this built-in transmitter is used to forward ringing signals from a standard bell system to the RCP24 radio bell.

RTS17E5001A01-K

### Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	1
Range	typically 150 m in good free-field conditions
Power supply	5 V - 24 V AC 6 V - 32 V DC
Transmission current	approx. 11 mA
Operation	via the connected power source
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	18/26,5/12 mm (without connecting wires)
Weight	5 g

Product number	Description
RTS17E5001A01-K	Built-in transmitter, Easywave, 1x PULSE, 5-24V AC / 6-32V DC

# RTS41 Surface-mounted transmitter

## Telephone call forwarding

The RTS41 stationary transmitter is used to forward an analogue telephone call signal to an external Easywave receiver, such as RCP24, RCP25 or RCJ32.

When a call is received, the RTS41 transmits a radio signal to an Easywave receiver and switches the receiver according to the selected operating mode.

RTS41E5001-01-01K

### Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	1
Range	typically 150 m in good free-field conditions
Power supply	via the ringing voltage of a telephone line
Operation	by telephone call
Function	forwarding an analogue telephone call signal
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	70/64/35 mm
Weight	32 g
Color	white similar RAL 9003

# RTS43 Surface-mounted transmitter

## ON/OFF | PULSE

The RTS43 wall-mounted transmitter can extend the switching functions of existing switches or buttons using a wireless interface.

Up to 2 buttons or switches can be connected. The transmitter checks whether the power has been coupled to a switch or button, and transmits the corresponding Easywave code A or B to an Easywave wireless receiver, which then activates a connected device.

The RTS43 features very high transmission power. It can therefore operate at ranges of up to 300 m in good free-field conditions.

RTS43E5002Axx-01K

# RCJ31 Flush-mounted receiver

## 230 V normally open

The bidirectional RCJ31 flush-mounted receiver is designed for direct switching of mains voltage devices. Up to 32 transmitters can be programmed.

In addition, a button input is available for local wired operation.

Programming is simply done on the device by pressing a button or via radio using remote programming (POTA).

In addition to the ON/OFF function, the operating modes LOGIC, DEAD MAN and TIMER (adjustable from 1 second to 30 hours) can be used.

The flat design facilitates installation in flush-mounted sockets, behind switches or behind sockets.

## 12-48 V DC LED strips

With the RCJ18, LEDs or LED strips with a supply voltage of 12-48 VDC can be dimmed or switched wirelessly.

The supply voltage corresponds to the voltage at the dimmed output, which can be loaded with up to 8 A.

It is operated using Easywave radio transmitters or an external button connected to the dimmer.

Dimming can be carried out either with or without memory function.

As an alternative, each transmitter can be assigned its own fixed dimming value.

RCJ18E5001A01-23K

### Technical specifications

Coding	Easywave Up to 32 transmitters can be programmed. POTA (only 2-button operation)
Frequency	868.30 MHz
Channels	1
Power supply	12-48 VDC SELV
Power consumption	0.5 W standby
Connected load	max. 384 W at 48 VDC
Output load	LED strips up 8 A
Operating modes	dim with memory (2- and 1-button operation) dim without memory (2- and 1-button operation) dim by external button (1-button operation) control fixed brightness levels (2- and 1-button operation)
Input	external mechanical button
Output	electronic switch
Operating temperature	0 °C to +40 °C
Dimensions (W/L/H)	48/48/25 mm

### Wiring diagram

### Scope of delivery

- Flush-mounted dimmer for LED strips
- Operating manual

### Models

Product number	Description
RCJ18E5001A01-23K	Flush-mounted dimmer, Easywave, 12-48VDC, 1x dimming (LED-Strips), potential-loaded, button input

# RCJ15 Flush-mounted receiver

## heating control

The RCJ15 flush-mounted receiver for heating control regulates a connected heating unit based on the switching signals received from an Easywave temperature sensor ST01.

In doing so, the RCJ15 determines by itself whether adjustment is needed via the ON/OFF mode or via pulse-width modulation (PWM).

In addition, up to 16 window contacts \*) (OFF/ON) can be programmed into the receiver in order to stop the heating automatically when a window is opened.

If the radio connection to the temperature sensor is interrupted, the RCJ15 goes into emergency mode after 10 hours, thus preventing the room from cooling down too much.

RCJ15E5001-01-23K

### Technical specifications

Coding	Easywave 1x ST01 and max. 16x RTS16 or RTS26 *) can be programmed.
Frequency	868.30 MHz
Channels	1
Power supply	230 V AC, 50 Hz
Power consumption	0.2 W standby 0.7 W relay switched (without load)
Operating modes	temperature control PWM ON/OFF
Output	1 potential-loaded relay contact (normally open)
Maximum contact load	
- resistive load $\cos\phi = 1.0$	10.0 A / 2,300 VA
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	48/48/25 mm

\*) The following window contacts are compatible:

RTS16E5001B02 OFF/ON  
RTS16E5001-02 OFF/ON, STATUS  
RTS16E5001A02 OFF/ON, STATUS  
RTS26E5001B03 OFF/ON  
RTS26E5001A03 OFF/ON, STATUS

### Scope of delivery

- Flush-mounted receiver
- Operating manual

### Models

Product number	Description
RCJ15E5001-01-23K	Flush-mounted receiver, Easywave, 230V, 1x normally open, potential-loaded, heating control PWM/ON/OFF

### Wiring diagram

# RCR02 DIN-Rail receiver

230 V ON/OFF 2-channel

The bidirectional RCR02 2-channel DIN rail receiver is used for potential-free activation of two mains power devices, and can be paired with 1-button and 2-button operation transmitters. 32 transmission codes can be paired with each switching output.

In addition, an Easywave neo server can be programmed into the receiver in order to use the bidirectional functionalities.

The receiver can be operated in ON/OFF, PULSE and DEAD MAN modes. ON/OFF mode also has TIMER functions and a LOGIC function.

The device is suitable for mounting to a standard DIN rail (35 x 7.5 mm).

RCR02EN5002A01-29K

## Technical specifications

Coding	Easywave neo 32 transmitters can be programmed per output
Frequency	868.30 MHz
Channels	2
Power supply	230 VAC, 50 Hz
Power consumption	0.4 W standby 1.2 W max. without load
Operating modes	ON/OFF (1-button operation) ON/OFF (2-button operation) PULSE TIMER fixed (3 and 7 minutes) TIMER individual (each transmitter) TIMER global (each output) DEAD MAN LOGIC (2-button operation)
Outputs	2 potential-free relay contacts (normally open)
Maximum contact load	- resistive load 16.0 A / 3.680 VA - inductive load 3.0 A / 690 VA
Operating temperature	-20 °C to +45 °C
Dimensions (W/L/H)	35/90/63 mm

## Wiring diagram

## Scope of delivery

- DIN-Rail receiver
- Operating manual

## Accessories (optional)

- ACC-ANT50-03-21P External antenna, 868MHz, 5m coaxial cable, clamp connection, magnetic base

## Models

Product number	Description
RCR02EN5002A01-29K	DIN-Rail receiver, Easywave neo, 230V, 2x normally open, potential-free

# RCR02 DIN-Rail receiver

230 V ON/OFF 4-channel

The bidirectional RCR02 4-channel DIN rail receiver is used for potential-free activation of four mains power devices, and can be paired with 1-button and 2-button operation transmitters. 32 transmission codes can be paired with each switching output.

In addition, an Easywave neo server can be programmed into the receiver in order to use the bidirectional functionalities.

The receiver can be operated in ON/OFF, PULSE and DEAD MAN modes. ON/OFF mode also has TIMER functions and a LOGIC function.

The device is suitable for mounting to a standard DIN rail (35 x 7.5 mm).

RCR02EN5004A01-29K

## Technical specifications

Coding	Easywave neo 32 transmitters can be programmed per output
Frequency	868.30 MHz
Channels	4
Power supply	230 VAC, 50 Hz
Power consumption	0.4 W standby 1.9 W max. without load
Operating modes	ON/OFF (1-button operation) ON/OFF (2-button operation) PULSE TIMER fixed (3 and 7 minutes) TIMER individual (each transmitter) TIMER global (each output) DEAD MAN LOGIC (2-button operation)
Outputs	2 potential-free relay contacts (normally open) 2 potential-free relay contacts (changeover)
Maximum contact load	- resistive load 16.0 A / 3.680 VA - inductive load 3.0 A / 690 VA
Operating temperature	-20 °C to +45 °C
Dimensions (W/L/H)	71/90/63 mm

## Scope of delivery

RCR02EN5004A01-29K	DIN-Rail receiver, Easywave neo, 230V, 2x normally open + 2x changeover, potential-free

## Wiring diagram

# RCR03 DIN-Rail receiver

230 V motor 2-channel

The bidirectional RCR03 2-channel DIN rail receiver is used for control of two tubular motors.

Different modes are used for controlling roller shutters and blinds.

In standard use, the running time is 120 seconds. If applications are dependent on running time, the running time can be adjusted or target positions can be set.

The terrace function allows the closing direction of one or several outputs to be locked, therefore preventing accidental lockout.

In addition, an Easywave neo server can be programmed into the receiver in order to use the bidirectional functionalities.

The device is suitable for mounting to a standard DIN rail (35 x 7.5 mm).

RCR03EN5002A01-29K

## Technical specifications

Coding	Easywave neo 32 transmitters can be programmed per output
Frequency	868.30 MHz
Channels	2
Power supply	230 V AC, 50 Hz
Power consumption	0.4 W standby 1.0 W max. without load
Operating modes	UP/STOP/DOWN (3-button operation, slat adjustment possible) UP/DOWN (2-button operation, Stop with opposite direction, slat adjustment possible) POSITION DEAD MAN
Outputs	2 outputs with 2 relay contacts each
Maximum contact load	
- resistive load $\cos\phi = 1.0$	6.0 A / 1,500 VA
- inductive load $\cos\phi = 0.8$	4.8 A / 1,200 VA
Operating temperature	-20 °C to +45 °C
Dimensions (W/L/H)	35/90/63 mm

# RCH01 Radio control

## for heating circuits 230 V

The RCH01 is a wireless controller for underfloor heating circuit manifolds.

The controller has five electronic outputs for regulating the temperature of five control zones. A maximum of 18 thermo-electrical actuators and one circulation pump can be connected.

A wireless temperature sensor ST01 can be paired with each output. If the temperature sensor detects deviations from a set temperature, a sensor telegram is transmitted and the relevant RCH01 output is activated.

RCH01E5005-01-29K

### Technical specifications

Coding	Easywave For each output one ST01 in I/O mode can be programmed.
Frequency	868.30 MHz
Channels	5
Power supply	230 V AC, 50 Hz
Power consumption	max. 0.5 W
Operating modes	Heating circuit control
Outputs	5 electronic switching outputs 1 relay contact (pump)
Total load	max. 20 W per output
Maximum contact load	
Valve actuators	transistor control (Only ohmic load permitted!)
Output 1-4	max. 4 valve actuators per output
Output 5	max. 2 valve actuators
Pump	
- resistive load $\cos\phi = 1.0$	5.0 A / 1,150 VA
- inductive load $\cos\phi = 0.8$	4.0 A / 920 VA
Protection degree	IP55 (in delivery condition)
Operating temperature	0 °C to +60 °C
Dimensions (W/L/H)	180/94/57 mm

### Scope of delivery

- Radio control
- Mounting material
- Operating manual

### Accessories (optional)

- ACC-ANT50-03-21P external antenna, 868MHz, 5m coaxial cable, clamp connection, magnetic base

### Wiring diagram

# RCA04 Radio access control

230 V

The radio access control RCA04 is used for potential free control of door openers or gate controls in applications with a large number of users.

Up to 999 transmission codes can be managed for operation. Programming is menu-driven via a display. When the code of a programmed transmitter is received, the relay output emits a tunable PULSE.

Each memory location can be locked, unlocked or deleted separately without having access to the associated transmitter.

All saved transmission codes and memory location settings can be backed up to a micro SD card.

The access control can be protected against unauthorized use with a 3-digit PIN code.

RCA04E5001A01-29K

## Technical specifications

Coding	Easywave Up to 999 transmitters can be programmed.
Frequency	868.30 MHz
Channels	1
Power supply	230 V AC, 50 Hz
Power consumption	1.3 W standby
Operating modes	PULSE (hold time 0.5-998 s, retriggerable) DEAD MAN
Output	1 potential-free relay contact (changeover)
Maximum contact load	
- resistive load	16.0 A / 3,680 VA
- inductive load	3.0 A / 690 VA
Protection degree	IP55 (in delivery condition)
Operating temperature	-20 °C to +50 °C
Dimensions (W/L/H)	130/94/57 mm

## Wiring diagram

## Scope of delivery

# RCL07 Call receiver

## external programming

The RCL07 call receiver has two channels. One channel is used for the operating modes and the switching functions. The second channel is activated when it receives an undervoltage telegram.

An LED lights up when the RCL07 receives a telegram from a call transmitter and the receiver switches according to the selected operating mode.

If the acknowledgment function is activated, receipt of an incoming call can be acknowledged using a programmed acknowledgment transmitter or directly on the RCL07.

With the care function, the call function can be muted for 15 minutes.

The RCL07 is also able to evaluate undervoltage telegrams signaling that the batteries in compatible radio transmitters are too low.

RCL07E5002B01-02K

### Technical specifications

Coding	Easywave Up to 32 CALL, 8 ACKNOWLEDGE and 8 CARE transmitters can be programmed.
Frequency	868.30 MHz
Channels	2
Power supply	12-24 V DC
Power consumption	0.3 W standby at 24 V DC
Operating modes	PULSE (1 second) ON/OFF (2-button operation)
Functions	CALL function ACKNOWLEDGE function CARE function battery undervoltage detection
Outputs	2 potential-free relay contacts (combined) 1x changeover (call) 1x normally open (battery undervoltage)
Maximum contact load	DC: 30 V / 1 A / 30 W
Protection degree	IP54 (with installed ø 5,30mm cable)
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	35/80/20 mm

# RCL07 Call receiver

## internal programming

The call receiver RCL07 signals incoming calls by switching a relay output according to the programmed operating mode.

If the acknowledgment function is activated, calls can be acknowledged via a button on the device or conveniently with a separate radio transmitter.

Weak batteries from learned radio transmitters are signaled via the second relay contact.

The call function can be muted for 15 minutes or unlimited, for example to avoid false alarms during daily care or when not in use.

The RCL07 is programmed exclusively via the internal operating buttons, so that accidental reprogramming is precluded.

RCL07E5002C01

### Technical specifications

Coding	Easywave Up to 32 CALL, 8 ACKNOWLEDGE, 8 CARE and 8 MUTE transmitters can be programmed.
Frequency	868.30 MHz
Channels	2

### Wiring diagram

With the MiniPager RRP01 calls from up to 64 Easywave transmitters can be received and signaled. The signaling is optical, acoustic and via vibrations. An individual text can be displayed on the MiniPager for each transmitter.

The integrated battery has a running time of approx. 48 hours and is recharged within approx. 3 hours. The battery can be charged using the supplied USB cable or the optionally available charging cradle.

The charging cradle can be expanded by up to 9 elements for the use of several MiniPagers.

A Windows PC is required to configure the MiniPager.

RRP01E5023A01-K

## Technical specifications

Coding	Easywave Up to 64 transmitters can be programmed.
Frequency	868.30 MHz
Display	LCD, 2 x 16 characters
Display resolution	128 x 32 pixel
Power supply	Battery Li-Ion 3.7V / 750mAh
Charging interface	USB Mini B or charging cradle
Charging time 0-100%	approx. 3 hours
Runtime	approx. 48 hours when fully charged
Operating temperature	+10 °C to +40 °C
Dimensions (W/L/H)	62/96.5/13.6 mm (without clip)
Weight	approx. 73 g (with clip)
Color	gray

## Scope of delivery

- MiniPager
- USB A to USB Mini B cable
- Operating manual

## Accessories (optional)

RRP01E5023A01-K	MiniPager, Easywave, 64 memory slots, display, battery, gray

# RCP14 Plug-in socket dimmer

## 230 V

The RCP14 plug-in socket dimmer can be used to control and dim lighting of up to 250 W.

It can be operated using Easywave radio transmitters with a 1-button operation or 2-button operation or by using the dimmer switch directly.

Ohmic, capacitive and inductive loads can be dimmed. This also includes dimmable energy saving lamps (ESL) and dimmable LEDs.

RCP14E5001-01-01K

### Technical specifications

Coding	Easywave Up to 32 transmitters can be programmed.
Frequency	868.30 MHz
Channels	1
Power supply	230 V AC, 50 Hz (protective contact plug)
Power consumption	0.7 W standby
Operating modes	dim with memory (2- and 1-button operation) dim without memory (2- and 1-button operation) control fixed brightness levels (2- and 1-button operation)
Output	1 electronic switch
Maximum contact load	
- resistive load	250 W
- inductive load	20 - 250 VA
- LED + ESL	7 - 100 VA
- capacitive load	250 VA
Operating temperature	-20 °C to +35 °C
Dimensions (W/L/H)	50/120/75 mm
Color	white similar RAL 9003

### Plug system

D/A/NL/S/N

### Scope of delivery

- Plug-in socket dimmer
- Operating manual

### Models

Product number	Description
RCP14E5001-01-01K	Plug-in socket dimmer, Easywave, 230V, D/A/NL/S/N, white

# RCP20 Plug-in socket receiver

ON/OFF

The bidirectional RCP20 plug-in socket receiver is simply inserted between the socket and the device that needs to be controlled.

After programming up to 32 Easywave transmitters, the device to be controlled can be switched on and off at will. Optionally, operation is also possible via a button on the receiver.

In addition, an Easywave neo server can be programmed into the receiver in order to use the bidirectional functionalities.

#### Energy efficient:

The RCP20 consumes only 0.4 W in standby mode.

RCP20EN5001A01-K

#### Technical specifications

Coding	Easywave neo Up to 32 transmitters can be programmed. POTA
Frequency	868.30 MHz
Channels	1
Power supply	230 V AC, 50 Hz (protective contact plug)
Power consumption	0.4 W standby 0.8 W relay switched (without load)
Operating modes	ON/OFF (2-button operation) ON/OFF (1-button operation) TIMER (1 second to 30 hours adjustable) LOGIC (2-button operation) DEAD MAN
Output	1x protective contact socket (D/A/NL/S/N)
Maximum contact load	16 A / 230 V AC
Operating temperature	-10 °C to +35 °C
Dimensions (W/L/H)	71.4/71.4/75.5 mm
Color	white similar RAL 9003

#### Plug system

#### Scope of delivery

- Plug-in socket receiver
- Operating manual
- Quick start guide

#### Models

Product number	Description
RCP20EN5001A01-K	Plug-in socket receiver, Easywave neo, 230V, 1x normally open, potential-loaded, D/A/NL/S/N, white

# RCP22 Plug-in socket receiver

## heating control

The RCP22 plug-in socket receiver for heating control regulates a connected heating unit based on the switching signals received from the Easywave temperature sensor ST01.

In doing so, the RCP22 determines by itself whether adjustment is needed either via the ON/OFF mode or via pulse-width modulation (PWM).

In addition, up to 16 window contacts\*) (OFF/ON) can be programmed into the receiver in order to stop the heating automatically when a window is opened.

If the radio connection to the temperature sensor is interrupted, the RCP22 goes into emergency mode after 10 hours, thus preventing the room from cooling down too much.

RCP22E5001A01

### Technical specifications

Coding	Easywave 1x ST01 and maximum 16x RTS16 or RTS26 *) can be programmed.
Frequency	868.30 MHz
Channels	1
Power supply	230 VAC, 50 Hz (protective contact plug)
Power consumption	0.2 W standby 0.7 W relay switched (without load)
Operating modes	temperature control PWM ON/OFF
Output	1x protective contact socket (D/A/NL/S/N)
Maximum contact load	16 A / 230 VAC
Operating temperature	-10 °C to +35 °C
Dimensions (W/L/H)	71.4/71.4/75.5 mm
Color	white similar RAL 9003

\*) The following window contacts are compatible:

RTS16E5001B02	OFF/ON
RTS16E5001-02	OFF/ON, STATUS
RTS16E5001A02	OFF/ON, STATUS
RTS26E5001B03	OFF/ON
RTS26E5001A03	OFF/ON, STATUS

### Plug system

### Scope of delivery

- Plug-in socket receiver
- Operating manual

### Models

Product number	Description
RCP22E5001A01	Plug-in socket receiver heating, Easywave, 230V, 1x normally open, potential-loaded, D/A/NL/S/N, white

# RCP23 Plug-in socket receiver

## PULSE

The RCP23 plug-in socket receiver receives transmission codes from programmed Easywave transmitters and triggers an 1-second pulse on the connected device via the pulse output. The pulse can also be triggered via a button on the RCP23.

With the RCP23, it is therefore very easy to retrofit or convert garage door motors with a radio interface.

The RCP23 also comes with a power outlet which is not switched and thus remains fully usable.

RCP23EK5001A01-K

### Technical specifications

Coding	Easywave Up to 32 transmitters can be programmed.
Frequency	868.30 MHz
Channels	1
Power supply	230 V AC, 50 Hz (protective contact plug)
Power consumption	0.4 W standby
Operation	PULSE (1 second)
Outputs	1x potential free relay contact (NO) 1x protective contact socket (D/A/NL/S/N)
Maximum contact load	pulse output: 1 A / 24 V DC mains voltage (not switchable): 16 A / 230 V AC
Operating temperature	-10 °C to +35 °C
Dimensions (W/L/H)	71.4/71.4/75.5 mm
Color	white similar RAL 9003

### Plug system

D/A/NL/S/N

### Scope of delivery

- Plug-in socket receiver
- Cable (length 150 cm)
- Operating manual

### Wiring diagram

RCP23EK5001A01-K	Plug-in socket receiver, Easywave, 230V, 1x pulse output, potential-free, D/A/NL/S/N, white

# RCP24 Plug-in socket radio bell

The RCP24 plug-in radio bell socket emits a visual and acoustic signal.

When a signal of a programmed Easywave radio transmitter is detected, the ringtone sounds. The ringtone length can be set by the user in the range of approx. 1 second to 1 minute.

In total, 32 transmitters can be programmed, each transmitter is assigned to one of 12 ring tones.

The volume can be adjusted in three stages and, like the ringtone length, applies to all programmed transmitters. An LED flashlight can be switched on as an option.

The RCP24 is also able to evaluate undervoltage telegrams, signalling that the batteries in compatible radio transmitters are too low.

#### Energy-efficient:

The RCP24 consumes only 0,2 W in standby mode.

RCP24E5001A01-K

## Technical specifications

Coding	Easywave Up to 32 transmitters can be programmed.
Frequency	868.30 MHz
Channels	1
Melodies	12
Power supply	230 V AC, 50 Hz (protective contact plug)
Power consumption	0,2 W standby
Volume	at a distance of 30 cm: 80 dB (low) 85 dB (medium) 90 dB (loud)
Operating temperature	-20 °C to +35 °C
Dimensions (W/L/H)	71.4/71.4/75.5 mm
Color	white similar RAL 9003

## Scope of delivery

- Plug-in socket radio bell
- Operating manual

## Models

Product number	Description
RCP24E5001A01-K	Plug-in socket radio bell, Easywave, 230V, D/A/NL/S/N, 12 melodies, white

# RCP25 Plug-in socket pager

The RCP25 plug-in socket pager emits a visual and acoustic signal.

When the signal of an Easywave radio transmitter is detected, the set ringtone sounds. The ringtone continues to repeat cyclically until receipt of the signal is acknowledged by a transmitter or directly on the pager itself.

The volume level can be set in 3 stages and applies to all programmed transmitters. An LED flashlight can be switched on as an option.

The RCP25 is also able to evaluate undervoltage telegrams signaling that the batteries in compatible radio transmitters are too low.

#### Energy-efficient:

The RCP25 consumes only 0,2 W in standby mode.

RCP25E5001A01-K

## Technical specifications

Coding	Easywave 32 call codes and 32 acknowledgment codes can be programmed.
Frequency	868.30 MHz
Channels	1
Melodies	12
Power supply	230 V AC, 50 Hz (protective contact plug)
Power consumption	0.2 W standby
Volume	at a distance of 30 cm: 80 dB (low) 85 dB (medium) 90 dB (loud)
Operating temperature	-20 °C to +35 °C
Dimensions (W/L/H)	71.4/71.4/75.5 mm
Color	white similar RAL 9003

## Scope of delivery

- Plug-in socket pager
- Operating manual

## Models

# SENSORS

# RTS16 Window contact

ON/OFF | OFF/ON | STATUS

The RTS16 window contact is used to monitor the status of windows, doors or gates. A change in status is communicated via radio as well as indicated by a two-colored LED.

Additionally, with each transmission, but at least once a day, the battery will be checked. If the battery capacity is low, a BATTERY LOW signal is sent and the battery status is checked again every 4 hours.

Depending on the version, the following functions are available:

**ON/OFF:** Opening the contact will transmit an ON signal and closing the contact an OFF signal.

**OFF/ON:** Opening the contact will transmit an OFF signal and closing the contact an ON signal.

**STATUS:** All changes in status are retransmitted after 10 seconds and then every 24 hours.

RTS16E5001B0x-41K

RTS16E5001B0x-02K

## Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	1
Range	typically 150 m in good free-field conditions
Power supply	1x 3V-battery, CR2032
Operating indicator	LED (green/red)
Function	ON/OFF OFF/ON STATUS
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	Transmitter module: 65/12/28 mm Magnetic angle: 18/18/13 mm
Weight	22 g (including battery)
Color	white similar RAL 9003 brown similar RAL 8015

# RTS26 Window handle contact

ON/OFF | OFF/ON | STATUS

The RTS26 window handle contact is used to monitor the status of windows. Upon opening or closing the window handle, a corresponding radio signal is transmitted.

Additionally, with each transmission, but at least once a day, the battery will be checked. If the battery capacity is low, a BATTERY LOW signal is sent and the battery status is checked again every 4 hours.

Depending on the version, the following functions are available:

**ON/OFF:** Opening the window handle will transmit an ON signal and closing the handle an OFF signal.

**OFF/ON:** Opening the window handle will transmit an OFF signal and closing the handle an ON signal.

**STATUS:** All changes in status are retransmitted after 10 seconds and then every 24 hours.

# SH01 Radio humidity sensor

Format 55

The SH01 radio sensor combines a humidity sensor with a push button.

The humidity sensor cyclically measures the relative air humidity and transmits a switching signal to an Easywave radio receiver when defined values are exceeded or reached again. The receiver can then switch connected devices, such as fans or electrical window openers.

The push button function is a standard Easywave application designed to switch electrical devices ON or OFF.

The sensor can be integrated into cover frames with a cut-out dimension of 55 x 55 mm produced by various manufacturers (see compatibility list).

SH01E5002-01-02K

## Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	2
Range	typically 150 m in good free-field conditions
Power supply	1x 3V-battery CR2032; alternatively 12-24 V AC/DC wired
Measuring range	1-99 % relative humidity (RH)
Accuracy	± 5 % (at 30-70 % RH)
Thresholds	>74% RH; fast increase of 4% at >40% RH
Function	measuring+transmitting air humidity levels, switching ON/OFF (2-button operation)
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	
Transmitter module	55/55/9 mm
Mounting plate	71/71/1.5 mm
Cover frame	80/80/9.4 mm
Weight	47 g (including battery and cover frame)
Color	white similar RAL 9003

## Scope of delivery

- Radio humidity sensor

# RTS40 Motion detector

Format 55

The RTS40 is a battery-operated radio motion detector for inside use. When motion is detected, the detector transmits an ON signal to an Easywave radio receiver, depending on the settings. After the set runtime has expired, an OFF-signal is transmitted. There are two product versions available:

**ON/OFF/AUTO:** The motion detector function can be permanently switched ON, OFF or to AUTOMATIC mode.

**AUTO:** The motion detector reacts automatically according to the configured settings.

The sensor can be integrated into cover frames with a cut-out dimension of 55 x 55 mm produced by various manufacturers (see compatibility list).

# SM01 Motion detector outdoor

The SM01 is a wireless and wired motion detector for automatic lighting control based on movement and brightness. It is suitable for wall mounting outdoors.

If a movement is detected while the measured brightness is below the set threshold value, the non-floating 230V relay output of the motion detector switches ON for the set time.

In addition, a radio telegram (Easywave code A) is sent, which can be taught into Easywave receivers. After the set time has elapsed, the relay output of the motion detector switches OFF and Easywave code B is transmitted.

SM01E5001A01-01K

## Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	1
Range	typically 150 m in good free-field conditions
Power supply	230 V AC, 50 Hz
Power consumption	0.8 W standby
Detection angle	180°
Detection area	crosswise max. 12 m, frontal max. 5 m
Brightness control	5 to 1000/∞ Lux
Switching period range	1 second to 20 minutes
Function	motion detection ON/OFF (2-button operation)
Output	1 potential-loaded relay contact (normally open)
Maximum contact load	
LED lamps	<2 W = 25 W   2-8 W = 90 W   >8 W = 100 W
Incandescent and halogen lamp load	2,300 W
Protection degree	IP55
Operating temperature	-25 °C to +45 °C
Dimensions (W/L/H)	127/85/100 mm
Weight	220 g
Color	white similar RAL 9003

## Scope of delivery

- Motion detector
- Mounting material
- Operating manual

# ST01 Temperature sensor

## heating Format 55

The ST01 temperature sensor is a battery-powered radio thermostat for regulating room temperatures ranging from approx. 14 °C - 25 °C. The sensor can be integrated into cover frames with a cut-out dimension of 55 x 55 mm produced by various manufacturers (see compatibility list).

The current room temperature is measured cyclically and compared with the adjustable set point. If there are deviations, the appropriate switching command is transmitted to the receiver.

In addition to the daytime operating mode, a nighttime temperature reduction function is available with an separately adjustable set-point temperature.

The sensor works either with ON/OFF commands or with an extended control system via pulse-width modulation (PWM).

ST01E5001-01-02K

### Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	1
Range	typically 150 m in good free-field conditions
Power supply	2x 3V-batteries, CR2032
Control modes	ON/OFF PWM (only to be used with RCP22 and RCJ15)
Function	measuring + transmitting temperature data daytime operating mode nighttime temperature reduction frost protection
Control range	approx. +14 °C to +25 °C
Operating temperature	-20 °C to +40 °C
Dimensions (W/L/H)	
Cover	55/55/16.0 mm
Mounting plate	71/71/1.5 mm
Cover frame	80/80/ 9.4 mm
Weight	51g (including batteries and cover frame)
Color	white similar RAL 9003

# ST02 Temperature sensor

## cooling Format 55

The ST02 is a battery-powered radio thermostat for regulating temperature in conservatories.

If deviations from the desired set-point temperature are detected, the appropriate switching signals are transmitted to the radio receiver via Easywave radio telegram. The receiver then switches connected fans, air conditioning units or shading systems in conservatories for example.

The sensor can be integrated into cover frames with a cut-out dimension of 55 x 55 mm produced by various manufacturers (see compatibility list).

ST02E5001-01-02K

# STH01 Temperature humidity sensor

Format 55

The STH01 transmits the current measured values for temperature and humidity every 10 minutes. In addition, the manual transmission of the measured values is possible at any time by pressing the front button.

The transmitted values can then be processed by the APC01 Control Center and used in scenes.

Based on this, for example the room climate can be controlled automatically via the Smarthome Server in connection with thermostats, shutters or fans.

In addition, the STH01 has a battery control function. If the capacity of the battery is low, this is signaled on the device by an LED and transmitted to the Smarthome Server.

The STH01 can not be operated without the Control Center APC01!

STH01EN5001A01-02K

# INTERFACES

# RXJ03 Flush-mounted repeater cascadable

The cascadeable RXJ03 flush-mounted repeater receives all radio telegrams from Easywave transmitters and re-transmits them after a delay of approx. 0.3 seconds.

A maximum of 3 repeaters can be used simultaneously in a radio system in order to almost quadruple the range of an Easywave radio transmitter.

The cascading function of the repeater prevents interference and system build-up.

The flush-mounted repeater fits into standard flush-mounted boxes.

RXJ03E5001B01-23K

### Technical specifications

Coding	Easywave Up to 32 transmitters can be programmed.
Frequency	868.30 MHz
Transmission delay	270 ms
Range	typically 150 m in good free-field conditions
Power supply	230 V AC, 50 Hz
Power consumption	0.5 W standby
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	48/48/25 mm

The Easywave RX09 USB stick is a bidirectional radio module (transceiver). With an application-specific operating and monitoring software, switching and control tasks can be carried out using a PC. The software is not included in the scope of delivery and must be created by the user.

Depending on the application, the USB stick can receive signals from any number of Easywave transmitters. The RX09 is encoded with 64 or 128 transmission codes through which various Easywave receivers can be controlled. The RX09 is therefore ideal for controlling and monitoring building technology.

RX09E50xx-02-01K

## Technical specifications

System requirements	Windows Vista / XP / 7 / 8 / 10 USB interface (compatible from 1.1)

## Models

Product number	Description
RX09E5026-02-01K	USB transceiver, Easywave, 64 serial numbers
RX09E5031-02-01K	USB transceiver, Easywave, 128 serial numbers

# APC01 Control Center server

The Control Center APC01 represents the smart control hub of an Easywave building installation.

The integrated radio module enables the control of up to 128 Easywave, Easywave neo and secwave devices with an Android or Apple smartphone or tablet.

The following functions are available:

- Creating scenes
- Time-controlled execution of switching commands
- Logical linking of sensors and actuators
- Astro function
- Push notifications
- Integration of Amazon Alexa \*)
- Weather data as a trigger for scenes
- Remote access
- Heatingcontrol

Individual  
functions may  
be chargeable!

APC01ENS5031A01-21K

## Technical specifications

Coding	Easywave Easywave neo (server) secwave
Frequency	868.30 MHz
Radio inputs	
Easywave	unlimited
Easywave neo	128
secwave	128
Radio outputs	
Easywave	128
Easywave neo	128
secwave	128
Power consumption	max. 3,5 W (5 V, 2 A)
Interfaces	1x 100 MBit/s BaseT Ethernet port 2x USB Wifi 802.11 b/g/n
Processor	Cortex A7 Quad Core
Main memory	1 GB
Flash	4 GB
Dimensions (W/L/H)	120/120/30 mm
Color	black, mat

## Connections

## Scope of delivery

- APC01 Control Center
- Ethernet cable (CAT 5)
- Plug-in power supply 230 V
- Operating manual

## Models

# APF03 Easywave Fon Alarm

## including wristband transmitter

With an Easywave transmitter, you can transmit a signal to the Easywave Fon Alarm telephone at the touch of a button. The telephone then dials five freely programmable telephone number one after the other.

If the recipient confirms the call by pressing a button on his phone, a conversation can be carried out using the integrated hands-free function.

The telephone provides persons in need of care with an ideal means of calling for help in "emergency situations".

Along with wristband or necklace transmitters, wall transmitters or fall mats, for example, can also be used. A total of eight Easywave transmission codes can be programmed into the telephone.

APF03E5000A01-K

### Technical specifications

Coding	Easywave 8 transmitters can be programmed.
Frequency	868.30 MHz
Power supply	7,5VDC (AC adapter included)
Emergency supply	4x AAA rechargeable batteries 1,2V, 600mA (not included)
Connection	analog TAE-F/RJ11
Dimensions (W/L/H)	200/200/87 mm
Color	white

### Phone Details

Telephone with large buttons, backlit display and clock
Night light function
Selectable menu language (German, English, French, Italian, Spanish)
Visual call indicator ("telephone ringing" LED)
Adjustable handset volume, tone control is possible
Up to +30 dB volume amplification
Compatible with hearing aids
Adjustable ringtone volume
30 phone book entries possible, 5+10 speed dial buttons
Voice output when button is pressed
Hands-free function
Caller number (CLIP) and call history (20 calls) display
Splash-proof wrist transmitter
30 s pre-recorded or user-recordable message

### Scope of delivery

- Fon Alarm telephone
- AC adapter, wall holder
- RJ11/RJ11 telephone cable
- TAE-F/RJ11 telephone plug
- Power supply 7,5VDC / 0,5 A
- Wristband transmitter RT26 including battery
- Operating manual

### Models

Product number	Description
APF03E5000A01-K	Easywave Fon Alarm, phone, wristband transmitter RT26

# RCD22 Radio control

## serial interface

The RCD22 transmits and receives Easywave telegrams. It is controlled via an RS232 interface in HEX format. The control and evaluation software has to be created by the user.

Where environmental conditions are unfavorable, the external antenna ACC-ANT50-03-21P can be connected to improve wireless reception. This is not included with the product, but can be ordered separately.

RCD22E5001A02

### Technical specifications

Coding	Easywave
Frequency	868.30 MHz
Channels	1
Power supply	230 V AC, 50 Hz
Power consumption	1,5 W standby
Output	RS232 interface
Protection degree	IP66 (when delivered)
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	130/94/57 mm

### Wiring diagram

### Scope of delivery

- Radio control
- Mounting material
- Operating manual

### Accessories (optional)

ACC-ANT50-03-21P external antenna, 868MHz, 5m coaxial cable, clamp connection, magnetic base

### Models

Product number	Description
RCD22E5001A02	Radio control, Easywave, 230V, RS232 interface

# RGD03 DALI gateway

## 200 mA DALI power supply

The Easywave Dali Gateway RGD03 serves as a power supply for a DALI bus and enables controlling of up to 32 DALI devices. All programmed Easywave transmitters trigger the same function. The transmitter buttons are automatically assigned to functions. A maximum of 200 mA can be provided on the bus for DALI devices.

In factory settings, the operating mode "DIMMING 2-button operation" is pre-configured as a broadcast to all DALI devices and can be used without further configuration.

If other operating modes are to be used, the configuration must be adapted on a Windows PC, using the separately available start-up cable and the "RGD03\_Configurator" software.

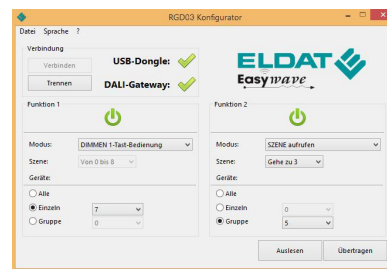

RGD03E5002A01-01K

### Technical specifications

Coding	Easywave Up to 32 transmitters can be programmed.
Frequency	868.30 MHz
Channels	1 (2 in 1-button operation)
Range	typically 150m in good free-field conditions
Power supply	230V ~ 50Hz
Power consumption	max. 60 mA
Output current DALI	max. 200 mA
Operating modes	ON/OFF (1-button operation) ON/OFF (2-button operation) DIM (1-button operation) DIM (2-button operation)* DEAD MAN (1-button operation) SCENE select JUMP through scenes
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	45/210/32 mm
Color	white similar RAL 9003

\* factory setting

### Configurator

RGD03 configurator

### Scope of delivery

- DALI gateway 200 mA
- Operating manual

### Accessories (optional)

RGD-ACC-01-00K	Start-up cable DALI, for RGD03, length 3 m, incl. software CD
----------------	---

### Models

Product number	Description
RGD03E5002A01-01K	DALI gateway, Easywave, 1x / 2x DALI commands, 200 mA DALI power supply

# RGD04 DALI gateway

## 24 mA DALI power supply

With the Easywave DALI gateway RGD04, DALI devices can be controlled by up to 32 Easywave transmitters. Additionally, the RGD04 serves as a bus power supply and can provide up to 24mA for DALI devices.

The gateway sends DALI commands as a broadcast in the operating mode "DIM two-button operation". This can not be changed by the user.

The RGD04 is ideal for controlling small DALI installations, such as individual DALI lights or groups of lights, with Easywave radio transmitters and without a separate DALI power supply.

RGD04E5001A01

### Technical specifications

Coding	Easywave Up to 32 transmitters can be programmed.
Frequency	868.30 MHz
Channels	1 (broadcast)
Range	typically 150m in good free-field conditions
Power supply	230V ~ 50Hz
Power consumption	max. 35 mA
Output current DALI	max. 24 mA
Operating modes	DIM (2-button operation)
Operating temperature	0 °C to +60 °C
Dimensions (W/L/H)	48/48/25 mm

### Scope of delivery

- DALI gateway 24 mA
- Operating manual

### Models

Product number	Description
RGD04E5001A01	DALI gateway, Easywave, 1x DALI broadcast, 24 mA DALI power supply

# RGK03 APPMODULE

## KNX-IoT gateway

The APPMODULE RGK03 allows the integration of ELDAT transmitters and receivers into KNX bus systems. Up to 128 transmitters and 128 receivers per wireless system can control KNX actuators or be controlled by KNX sensors.

The KNX IP router-, KNX IP tunneling- and VPN- functions offer maximum flexibility in configuration. In addition, a wide variety of smart home apps are available, for example to integrate SONOS®, Philips® hue, FRITZ!Box® or Bose® devices.

After purchasing the appropriate apps, the building automation or the Easywave radio system can be connected to a telephone system, television or router, for example.

The pre-installed Alexa® app enables voice control in the smart home system.

RGK03ENS50A01-K

### Technical specifications

Coding	Easywave Easywave neo (server) secwave
Frequency	868.30 MHz
Radio inputs	
Easywave	1.024
Easywave neo	128
secwave	128
Radio outputs	
Easywave	128
Easywave neo	128
secwave	128
Power supply	12-32 VDC
Power consumption	at 12 V DC: 300 mA at 24 V DC: 150 mA
Typical consumption	≤ 5 W
Operating temperature	- 5 °C to +35 °C
Dimensions (W/L/H)	72/90/63 mm, DIN-rail 4TE
Color	gray, mat

### Scope of delivery

- APPMODULE
- External antenna with magnetic base, SMA connector, cable length 2.5 m
- Operating manual

### Models

Product number	Description
RGK03ENS50A01-K	APPMODULE, Easywave neo, KNX-IoT gateway, 12-32V DC, 128 serial numbers

All Smart Home apps are independent products and have no legal connection to the third-party manufacturers mentioned. ELDAT EaS GmbH does not own the above-mentioned trademarks.

ELDAT radio system

ACCESS CONTROL

	page
General information	100
Transmitter	101
Flush-mounted receiver	102
Mini receivers	103
Plug-in socket receiver	105

The secwave wireless system

With the secwave products, ELDAT has the more stringent security requirements of access control applications covered.

The secwave wireless system uses 128-bit encryption based on the AES standard (Advanced Encryption Standard).

AES 128-bit encryption is one of the most frequently used encryption standards, by banks for example.

The encryption and telegram structure makes secwave products incompatible with Easywave products.

By using the Easywave Control Center, it is possible to connect both systems and thus control a secwave receiver with an Easywave transmitter if both devices are within range of the Control Center.

Please note that the advantage of encrypted transmission is no longer available in this case.

Range

The range of a transmission path depends on many factors. For this reason, caution must be taken when making claims about range. A relatively reliable indicator of range is the range in free-field conditions. Secwave products aim to achieve a range of at least 150 m in optimal free-field conditions.

Factors which may influence the range include the mounting site, the mounting surface, objects in the transmission path, the power of the transmitter and the sensitivity of the receiver.

As an example, the following estimates indicate to what extent objects in the transmission path can cause attenuation:

Material	Attenuation
Air/free field	0 %
Wood/plaster	5-20 %
Brick/concrete	10-40 %
Reinforced concrete	50-90 %
Metal walls/metal grating	90-100 %

# RT42 Handsender

## PULSE

The RT42 hand transmitter is a wireless transmitter which transmits the secwave code at the push of a button, and activates the secwave wireless receiver according to the selected mode.

The transmitter has a battery control function which checks the battery capacity. If the battery capacity is low, the LED flashes after the transmitter button is released.

### Technical specifications

Coding	secwave AES 128-bit encryption Not compatible with Easywave products!
Frequency	868.30 MHz
Channels	4
Range	typically 150 m in good free-field conditions
Power supply	1x 3V-battery, CR2032
Operating indicator	LED
Operating modes	4x PULSE
Operation	transmission starts as soon as button is pressed
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	37/61.5/10.7 mm
Weight	30 g (including battery)
Color	black similar RAL 9005

### Scope of delivery

- Hand transmitter incl. battery
- Key protection
- Operating manual

### Accessories (optional)

RT42-ACC-01-21U

Key protection RT42/RT43  
black similar RAL9005

### Models

Product number	Description
RT42S5004A01-21K	Hand transmitter, secwave, 4x PULSE, metal bracket, black

# RCJ33 Flush-mounted receiver

## pulse output

The RCJ33 flush-mounted receiver receives transmission codes from up to 200 programmed secwave radio transmitters and triggers a 5-second pulse on the connected device via a pulse output (changeover).

This enables, for example, the safe control of a door buzzer via radio. In addition, a button input is available so that the pulse can also be triggered via wire by a key switch.

The flat design facilitates installation in flush-mounted sockets, behind switches or behind sockets.

RCJ33S5001A01

### Technical specifications

Coding	secwave AES 128-bit encryption Up to 200 transmitters can be programmed. Not compatible with Easywave products!
Frequency	868.30 MHz
Channels	1
Power supply	12-24 V AC/DC
Power consumption (at 24 V DC)	0.2W standby 1.0W relay switched (without load)
Operating modes	PULSE (5 seconds)
Input	1 external button
Output	1 potential-free relay contact (changeover)
Maximum contact load	
- AC	60 V/1A /60 VA
- DC	30 V/1A /30 VA
Operating temperature	-20 °C to +45 °C
Dimensions (W/L/H)	43/42/17.5 mm

### Wiring diagram

RCJ33S5001A01	Flush-mounted receiver, secwave, 12-24V, 1x pulse output (5 s), potential-free, button input

# RCL08 Mini receiver

## 12-24 V AC/DC 2-channel

The wireless controller RCL08 has two potential-free re-  
lay contacts which can be activated by ELDAT secwave  
transmitters.

The RCL08 is operated at 12-24 V AC/DC, and up to 100  
secwave transmitters per channel can be paired.

RCL08S5002A01-01K

### Technical specifications

Coding	secwave AES 128-bit encryption Up to 100 transmitters per channel can be programmed. Not compatible with Easywave products!
Frequency	868.30 MHz
Channels	2
Power supply	12-24 V AC/DC
Power consumption	0.4 W standby at 24 VDC 0.8 W standby at 24 VAC
Operating modes	ON/OFF (1-button operation) PULSE (1 second)
Outputs	2 potential-free relay contacts (changeover)
Maximum contact load	
- AC	24 V / 1A / 24 VA
- DC	30 V / 1A / 30 W
Operating temperature	-20 °C to +60 °C
Dimensions (W/L/H)	70/64/35 mm
Color	white similar RAL 9003

### Scope of delivery

- Mini receiver
- Mounting kit
- Operating manual

### Accessories (optional)

#### Description

Mini receiver, secwave, 12-24V, 2x changeover, potential-free, white

### Wiring diagram

# RCL09 Mini receiver

## 12-24 V AC/DC 2-channel IP65

The wireless controller RCL09 has two potential-free relay contacts which can be activated by ELDAT secwave transmitters.

The RCL09 is operated at 12-24 V AC/DC, and up to 100 sec-wave transmitters per channel can be paired.

With regard to technical features, the RCL09 is identical to the RCL08, but the housing is dustproof and waterproof.

RCL09S5002A01-01K

### Technical specifications

Coding	secwave AES 128-bit encryption Up to 100 transmitters per channel can be programmed. Not compatible with Easywave products!
Frequency	868.30 MHz
Channels	2
Power supply	12-24 V AC/DC
Power consumption	0.4 W standby at 24 VDC 0.8 W standby at 24 VAC
Operating modes	ON/OFF (1-button operation) PULSE (1 second)

# RCP23 Plug-in socket receiver

## pulse output

The RCP23 plug-in socket receiver receives transmission codes from up to 200 programmed secwave radio transmitters and triggers an 1-second pulse on the connected device via the pulse output. The pulse can also be triggered via a button on the RCP23.

With the RCP23, it is therefore very easy to safely retrofit or convert garage door motors with a radio interface.

The RCP23 also comes with a power outlet which is not switched and thus remains fully usable.

RCP23S5001A01

### Technical specifications

Coding	secwave AES 128-bit encryption Up to 200 transmitters can be programmed. Not compatible with Easywave products!
Frequency	868.30 MHz
Channels	1
Power supply	230 V AC, 50 Hz
Power consumption	0.4 W standby
Operating modes	PULSE (1 second)
Outputs	1x potential-free relay contact (normally open)
Maximum contact load	pulse output: 1 A / 24 VDC mains voltage (not switchable): 16 A / 230 V AC
Operating temperature	-10 °C to +35 °C
Dimensions (W/L/H)	71.4/71.4/75.5 mm
Color	white similar RAL 9003
